# TRAVERTINE DESIGN PROJECT

AN ICON OF ARCHITECTURAL BEAUTY.

Travertine Design Project is Landmark's tribute to a cornerstone material in architectural history, cherished for its elegance, intricate textures, and lasting resistance.

A porcelain pavers-based reinterpretation of Travertine in multiple sizes, available in two distinctive aesthetics: Cross Cut and Vein Cut.

Cross Cut captures the stone's natural essence, with a cloud-like pattern, created by cutting against the directional vein, delivering a vibrant look.

Vein Cut emphasizes linear veining across the surface, displaying the classic beauty of Travertine with a contemporary tone-on-tone structure.

A COMPLETE DESIGN SOLUTION.

Featuring 20mm Porcelain Pavers, 9mm coordinated Porcelain Tiles, 9mm Porcelain Grip Tiles, Porcelain Mosaics and Veneers, and special trim pieces, Landmark's Travertine Design Project provides a comprehensive interpretation of travertine.

Designed for outdoor floors and walls, it enables visual continuity with an eye-catching total stone-effect look.

A WIDE RANGE OF SIZES FOR MULTIPLE PATTERNS.

Thanks to a broad selection of sizes, ranging from traditional 12"x12" to the large size 24"x48", Travertine Design Project allows a variety of single and multi-size laying patterns to meet every design need.

Additionally, the performance of the porcelain pavers ensures the highest standards of safety, resistance, and durability.

The color of tiles printed in this catalog may differ from actual tiles. Tile color reproductions in this catalog are representative only. Slight tone and shade variations are inherent in porcelain tiles. Before selecting a color, we recommend that you contact your local representative, who will provide you with a sample piece of the requested tile.

This porcelain tile product is manufactured with a V2/V4 shade variation. Remember that the amount of color as well as the texture of each piece may vary from tile to tile. Inspect the product immediately upon delivery and select tiles from many boxes during installation to minimize and blend any possible color difference.
